

GRAND PRIX PREMIUM

Preparation designed for maintenance specifically formulated for horses who perform schooling exercises.

The product composition has been thought with the scope of avoiding the lack of protein and energetic intake obtained from grains and legumes such as oat, barley and alfalfa, traditionally utilized in the equine diet.

Our range of products have to be administered on customized quantities on the basis of the exercises carried out or of the growing stage, and also wisely providing hay of polyphite meadows for race horses and legumes for broodmares and breeding foals. Absolutely not to be underestimated the importance of quality of the water often source of poisonous problems.

Our skilled technicians are at your disposal for offering a personalized service in line with your necessities.

In addition to the verified and already well-known nutritional value of these formulas they have been integrated with a percentage of "yucca" extracts. In the livestock sector that plant finds widely use in the production of pet animals food (dogs, cats and ferrets) seeing that it is a gut functionality regulator. Beneficial property of this phyto derivative is mainly represented in the capability of relieving the orthopedic problems that affecting vaulting horses (arthritis, tendinitis, etc.). The saponins percentage provided by "yucca" grants the improvement of gastrointestinal transit identifying the water particles in the gut. There is subsequently a preventative effect in regard to colic syndrome.
